HYBRID BLADES

High quality hybrid performance at competitive prices.

Fits same applications as the beam blade and includes an adapter for Audi/VW applications.

- Multi-fit connector technology
- Molded natural rubber squeegee resists wear cause by weather conditions, or washer fluids and other elements
- Soft cover hybrid blade that offers the appearance of a beam blade
- Aerodynamic spoiler designed for smoother wipe at high speeds

Kooler Klean™ Transmission Cooler & Line Flush #09-19001

LUBEGARD Kooler Klean Trans Flush uses a proprietary mix of detergents to safely clean transmission lines in automatic, CVT, DCT and manual transmissions. This product works without any water to remove grease, dirt, grime, and metal shavings that can clog up the lines. And it inhibits their return. Because of its unique solvent formulation, it will not degrade new automatic transmission fluid. The safest, most complete Transmission Cooler Line Flush available!

Automatic Transmission Fluid Protectant with LXE® Technology

#09-60902

LUBEGARD® Synthetic Automatic Transmission Fluid Protectant is engineered to raise the thermal and oxidative stability level of automatic transmission fluids, so when it operates at elevated temperatures, it does not thin out and pyrolyze, burn, or react with oxygen and form deposits.

Automatic Transmission Fluid Protectant with LXE® Technology

#09-61910

LUBEGARD® Highly Friction Modified (HFM) Automatic Transmission Supplement contains a concentrated additive package with additional friction modifiers that can be safely added to any ATF (except CVT, DCT, and Ford Type F [1986 and earlier models]) including full synthetic, semi-synthetic, and conventional fluids to eliminate severe torque converter lock-up shudder and soften harsh shifts.

PRESSURIZED SPRAYER

- Professional corrosion-resistant, pressurized fluid canister for use with brake cleaners, carb cleaners, degreasers and solvents
- Can be pressurized from 80-150 PSI
- Not for use with water based materials or paint
