PYROPLEX GOLD

SEMI-SYNTHETIC ALUMINUM COMPLEX GREASE

- Extreme pressure and anti-wear performance especially in highly shock loaded areas.
- 6% molybdenum disulfide solids. Semi-synthetic basestock for unique cold flow and pumping capabilities.
- Excellent thermal stability with a high dropping point
- Enhanced “stay in place” technology with hydro-activated polymers providing very low water spray off rates

HYBRID BLADES

High quality hybrid performance at competitive prices.
Fits same applications as the beam blade and includes an adapter for Audi/VW applications.

- Multi-fit connector technology
- Molded natural rubber squeegee resists wear cause by weather conditions, or washer fluids and other elements
- Soft cover hybrid blade that offers the appearance of a beam blade
- Aerodynamic spoiler designed for smoother wipe at high speeds

SPOTLIGHT

Diesel Anti-Gel

The weather is changing early this year. Be prepared for fall and winter temperatures with Lucas Cold Weather Diesel Treatment Anti-Gel. It is designed to prevent cold filter plugging in your diesel and bio-diesel vehicles.

This 64oz bottle contains REAL water dispersants to remove moisture from the whole fuel system. It prevents fuel gelling, contains no alcohol and will not void warranties.

“MADE IN AMERICA, SOLD TO THE WORLD!”

Kooler Klean™ Transmission Cooler & Line Flush

#09-19001

LUBEGARD Kooler Klean Trans Flush uses a proprietary mix of detergents to safely clean transmission lines in automatic, CVT, DCT and manual transmissions. This product works without any water to remove grease, dirt, grime, and metal shavings that can clog up the lines. And it inhibits their return. Because of its unique solvent formulation, it will not degrade new automatic transmission fluid. The safest, most complete Transmission Cooler Line Flush available!

Automatic Transmission Fluid Protectant with LXE® Technology

#09-60902

LUBEGARD® Synthetic Automatic Transmission Fluid Protectant is engineered to raise the thermal and oxidative stability level of automatic transmission fluids, so when it operates at elevated temperatures, it does not thin out and pyrolyze, burn, or react with oxygen and form deposits.

Automatic Transmission Fluid Protectant with LXE® Technology

#09-61910

LUBEGARD® Highly Friction Modified (HFM) Automatic Transmission Supplement contains a concentrated additive package with additional friction modifiers that can be safely added to any ATF (except CVT, DCT, and Ford Type F [1986 and earlier models]) including full synthetic, semi-synthetic, and conventional fluids to eliminate severe torque converter lock-up shudder and soften harsh shifts.

PRESSURIZED SPRAYER

- Professional corrosion-resistant, pressurized fluid canister for use with brake cleaners, carb cleaners, degreasers and solvents
- Can be pressurized from 80-150 PSI
- Not for use with water based materials or paint
